

FALL PBS RESOURCES

for families and educators

ROBOT DOCTOR

WQED and RobotWits are partnering to provide this educational video series that extends robotics and mathematics lessons to high school age students during the COVID-19 crisis. The series is available throughout November as part of the Learning At Home programming.

READY, SET, MUSIC

Feelings can be hard for children to talk about. Helping children use words to describe what is happening inside them is an important part of Social and Emotional Learning. These words and messages can be taught and reinforced through music.

WQED SOS

Working with the Pennsylvania Department of Education, we have created Learning at Home, your connection to thousands of hours of educational and entertaining videos, activities and games to support you.

FAMILY NIGHT: CODING

Statewide broadcast December 10, 2020
from 7pm-8pm on all 7 Pennsylvania PBS station

Program Description: This hour-long special will encourage children, ages kindergarten through fifth grade, and their families to get excited about computer science together! Computer science is an exciting and growing field that impacts the world in countless ways. A large part of computer science is computer coding. If you don't know much about computer coding, you will not want to miss this special. Children and their families will not only learn about coding and the exciting careers that depend on it, they'll also be invited to participate in hands-on activities that will help to introduce the basic principles of coding. The best part? No computer or special materials will be required. Tune in to your PA PBS station on Thursday December 10 at 7pm.

LEARNING AT HOME

November & December

Every week, you can count on your Pennsylvania PBS station to provide instructional programming for your learner. These schedules are organized by appropriate grades and color-coded by subject matter. Click the links underneath each program to access free supplemental material to extend the learning.
